## 5 Years Ago, Video Was The Future

(Spoiler Alert: It Still Is)

When Viddyoze first launched back in 2015, we said video was the most important weapon in your marketing arsenal.

It's was true then, and it's even more true now.

Video traffic share has increased by 88%!

YouTube is now seeing 30,000 hours of new content uploaded every HOUR.

### And that creates a problem...

## The Explosive Growth Of Video Has Created Corrosive Competition.

You've got a video? Great - but so has everyone else (and everyone else's mother).

And yes, most video is pretty bad. But that's the problem.

The sheer level of noise made by bad video makes it almost impossible for your video to get the attention it deserves.

There's really only 2 options. Go BIG, or go HOME.

Let's be honest... that's not a hard choice.

### Excellent Choice for Video Creation

Iddyoze is an excellent program for both beginners and professionals and everyone in between. Their templates are high quality and there's a ton of them there. My clients think I spend hours at the computer making their videos but in reality most of the time I can generate a high quality video in no time at all. I would recommend Viddyoze to anyone looking for a quality video program.
